

Category	Title	Prompt
AI & Content Generation	Weather Wear Recommendation	Based on today's forecast, send a brief outfit recommendation notification (e.g., jacket + umbrella, sunscreen + hat).
AI & Content Generation	Joke Generator Chatbot	Create a chatbot using Azure OpenAI that tells a joke when prompted. After delivering the joke, ask the user if they want to hear another or finish.
AI & Content Generation	Weather-Based Outfit Avatar	Use local forecast to generate an avatar suggesting attire (e.g., raincoat, winter jacket). Deliver as an image via email.
AI & Content Generation	Daily Life Quote Emailer	Use OpenAI to generate an inspiring life quote and send it via email using SendGrid.
Data & Analytics	LinkedIn Profile Analyzer	Analyze posts from a given LinkedIn profile [redacted-url] to summarize the individual's characteristics. Then suggest five similar profiles for comparison.
Data & Analytics	FreeSQL Database Sample Loader	Create tables in a FreeSQL database and populate them with sample records for testing.
Data & Analytics	Home Depot Product Search API	Expose an API endpoint where a search query can be provided. Use this query to scrape the Home Depot website and return the top five matching products in structured JSON format.
Data & Analytics	Database → Excel Export	Fetch data from a database, sort it alphabetically by last name, and export only the first name, last name, and email into an Excel file.
Data & Analytics	Supermarket Data Scraper → Excel	Scrape a supermarket website to collect store information, including street address, city, and GPS coordinates. Export the results into an Excel file with structured columns.
Data & Analytics	Kaggle Competition Helper	Track a specified Kaggle competition, download the latest dataset snapshot, and notify when new discussions or top notebooks appear.
Data & Analytics	Telecom & FiberCo Web Scraper	Use Puppeteer to scrape search engines for telecom and fiber companies exploring digital transformation. Generate a list with company names and links.
Developer Tools & Testing	Daily Website Speed Monitor + Weekly Digest	At 08:00 IST daily, measure page load speed for [redacted-company].com; at 09:00 IST email results; every Monday, deliver a weekly trend analysis.
Developer Tools & Testing	Hello World Script	Create a simple script that prints 'Hello, World!' to the console.
Developer Tools & Testing	PR & Code Review Reminders	Each morning, list open PRs awaiting my review across Azure DevOps/GitHub and send a reminder email including time-waiting and risk tags.
Developer Tools & Testing	WordPress Table Prefix Cleanup	Given database credentials and backups, safely remove or standardize a WordPress table prefix. Validate site health after changes.
Developer Tools & Testing	CI Failure → Solutions in Teams	On CI build failure, capture error logs, search knowledge sources for likely fixes, and post the top three suggestions to Microsoft Teams.

Category	Title	Prompt
E-commerce & Market Research	Amazon 80% Discount Verifier	Compile a list of electronics on Amazon claiming ~80% discounts. Cross-check against recent price history or alternative sellers to flag likely mispricing or low-quality listings. Output a ranked shortlist.
E-commerce & Market Research	Amazon Top Sellers (Top 10)	Identify the top ten best-selling products in a specified Amazon category and return a summary including ratings and price band.
E-commerce & Market Research	PS5 Price Alert (Flipkart)	Monitor the PS5 price on Flipkart. If the price drops below 60,000 INR, send an alert email to my official account.
E-commerce & Market Research	Gaming Mouse Deal Finder (Amazon.in)	Scan Amazon.in for top-value gaming mouse deals today and email a shortlist with product names, prices, and purchase links [redacted-url].
E-commerce & Market Research	Amazon India 80% Discount Scanner	Search Amazon India for electronics advertised at ~80% discount and return a structured list of legitimate offers with product name, current price, typical price (if available), and product URL [redacted-url].
Email & Messaging	Intent-Based Email Routing	Classify incoming emails by intent (support, billing, sales, HR) and route to the correct distribution list with a short summary.
Email & Messaging	Outlook → WhatsApp Notification Flow	Detect new Outlook emails matching configurable rules (sender/keywords/importance), format a concise WhatsApp notification (sender, subject, preview, timestamp), and send via an approved connector. Include rule customization.
Email & Messaging	Inbox Attachment Downloader (Top 10)	Download the ten most recent email attachments from the inbox, store them in a dated folder, and email a receipt with filenames.
Email & Messaging	Outlook Email → Word Summaries	Fetch the latest five emails, generate concise summaries with Azure OpenAI, and create a Word document containing each email's subject and summary.
Email & Messaging	Outlook ↔ WhatsApp Two-Way Bridge	Forward selected Outlook emails to WhatsApp as alerts; if a WhatsApp reply arrives, append it to the original Outlook thread using a correlation ID. Include retry and error logging.
Email & Messaging	Universal WhatsApp Chatbot	Provide a WhatsApp chatbot that can handle general user queries with guardrails, context memory, and clear escalation paths.
Email & Messaging	Keyword Email Collector	Search for emails containing the keyword 't_rpa', download attachments, and save to a secure location with a manifest.
Email & Messaging	Email → WhatsApp Translator	Translate incoming Outlook emails into compact WhatsApp messages (sender, subject, ~150–200 character summary) while preserving meaning and removing sensitive data.
Email & Messaging	Outlook Connectivity Check	Verify access to the specified Outlook mailbox [redacted-email] and report authentication status and last sync time.
Finance & Accounting	Tally Form Data Extractor	Build an automation in UiPath to fetch and process details from a Tally form.
Finance & Accounting	Annual Invoice Total (SharePoint)	Download last year's invoices for a specified customer from SharePoint and calculate the total billed amount.
Finance & Accounting	Unpaid Invoice Reminder Bot	Extract all unpaid invoices from accounting software and automatically send reminder emails to the respective clients.

Category	Title	Prompt
Finance & Accounting	Invoice Data Extractor (Structured Fields)	Extract vendor, bill number/date, description, base amount, taxes, and totals from invoices and save as normalized records for finance review.
Finance & Accounting	Receipt OCR → Accounting String → SharePoint	Fetch scanned receipt images from SharePoint, extract description/amount/VAT via AI OCR, build an accounting string using rules at [redacted-url], and upload a .txt with the same base filename back to SharePoint.
Finance & Accounting	Stripe → SharePoint + HubSpot Updater	Increment 'Stripe Incoming Payments' for the month a customer was created; also create/update corresponding HubSpot contacts (name, email, company). Accept a 'last processed' timestamp as input.
Finance & Accounting	Smart Expense Categorization	Ingest expense reports, automatically categorize line items, flag anomalies or policy violations, and produce a review queue for finance.
HR & People Ops	Leave & Benefits Auto-Processor	Detect emails with subject 'Leave', extract dates and type, log the request for approval, and send confirmations to the employee and approver.
HR & People Ops	CV Data Extractor → Excel	From CVs stored in [redacted-path], extract candidate names, email addresses, phone numbers, and compare them against job description criteria. Save the output in Excel.
HR & People Ops	Daily Motivation Image Generator	Generate a daily motivational image containing the [redacted-company] logo at the top with a positive message (e.g., 'Happy Wednesday — let's make today productive!'). Deliver it to the team.
HR & People Ops	Motivational Outlook Emailer	Generate a motivational message with OpenAI and send it to a predefined list of recipients via Outlook 365.
HR & People Ops	Resume Screening & Ranking	Parse resumes against a job description, score candidates on key criteria, and output a ranked shortlist with rationale for each score.
HR & People Ops	Employee Record Lookup	Retrieve core employee details for a given employee ID (e.g., EMP1002) and present a profile summary, redacting any sensitive URLs [redacted-url].
IT Operations & Monitoring	Ticket Export via API Endpoint	Call the provided endpoint [redacted-url] to export tickets, normalize fields (status, assignee, timestamps), and return a CSV plus a summary count by status.
IT Operations & Monitoring	UiPath Asset Migration	Copy assets created in the UiPath development tenant into the testing tenant to synchronize environments.
IT Operations & Monitoring	Urgent Email → Telegram Instant Alert	Detect emails with urgent language or high importance and push an immediate alert to Telegram with sender, subject, and brief summary.
IT Operations & Monitoring	ServiceNow Ticket Digest	Every 8 hours, fetch critical ServiceNow tickets created during that period, group similar issues, generate a summary, email it via Outlook and send whatsapp notification.
IT Operations & Monitoring	Critical ServiceNow Roll-Up (8-Hour Window)	Every 8 hours, fetch newly created critical ServiceNow tickets, cluster similar issues, summarize key patterns, and email a consolidated report.

Category	Title	Prompt
IT Operations & Monitoring	JIRA Ticket Fetcher	Fetch all active tickets from my JIRA project and return them in a structured report.
IT Operations & Monitoring	UiPath Queue Exception Investigator	From a specified UiPath Orchestrator queue, pull 'System Exception' items, fetch related job logs, and compile a root-cause oriented report.
IT Operations & Monitoring	Sprinto Data Uploader	Import Spring Verify data into the Sprinto application, validate required fields, and produce an upload summary with any rejected records.
IT Operations & Monitoring	SharePoint Connectivity Test	Perform a SharePoint connectivity and permission check, reporting API latency, auth status, and accessible libraries.
IT Operations & Monitoring	Azure Boards Daily Task Digest	Pull assigned tasks from Azure Boards each morning and email a summary grouped by New, Completed, and Pending, including task age for Pending.
Meetings & Scheduling	Meeting Wrap-Up: Attendees & Summary	Collect all completed meetings from today, summarize key points, and include a consolidated list of participants and emails. Deliver as an end-of-day digest.
Meetings & Scheduling	Meeting Schedule → WhatsApp Summary	Fetch tomorrow's meetings, generate a condensed agenda summary, and send it to WhatsApp as a morning briefing.
Meetings & Scheduling	IPAC Channel Auto-Responder	For messages from specified colleagues about IPAC, analyze the Microsoft Teams channel 'IPAC & [redacted-company]' context and reply with an up-to-date status using AI. Log the response.
News & Summarization	Yahoo News Summarizer API	Create a REST API endpoint that, when called, retrieves the day's top five Yahoo News articles and returns short summaries for each.
News & Summarization	Yahoo News Top 5 Summaries (API)	Expose a REST endpoint that returns the day's five top Yahoo News stories with concise summaries and source metadata.
PR & Outreach	Nordic AI/Automation Media List + Drafts	Find 50 recent AI/automation journalists/bloggers in the Nordics, collect contact details and latest article link, import to HubSpot as 'PR Outreach – [redacted-company]', and draft personalized outreach emails (do not send).
Product Search	Home Depot Top-5 Product Finder (API)	Provide an API that accepts a query, searches Home Depot, and returns the top five products in structured JSON with name, price, rating, and product link [redacted-url].
Productivity & Collaboration	Gmail Last Email Checker	Access my Gmail inbox and return details of the most recent email received.
Productivity & Collaboration	IPAC Project Email Handler	Check incoming emails every 5 minutes for references to the IPAC project. Update the Confluence task page with relevant details and perform any specified actions.

Category	Title	Prompt
Productivity & Collaboration	Two-Section Notes File	Create a notes document with two predefined sections (e.g., 'Ideas' and 'Next Actions') and save it to cloud storage.
Productivity & Collaboration	WhatsApp Chatbot with Azure OpenAI	Create a WhatsApp chatbot that interacts with users via text while leveraging Azure OpenAI for intelligent responses.
Productivity & Collaboration	Teammate Chatbot Assistant	Develop a chatbot that can interact with teammates and assist with simple queries or conversations.
Productivity & Collaboration	WhatsApp Chatbot Assistant	Develop a chatbot that interacts with users messaging me on WhatsApp, answering queries in real time.
Productivity & Collaboration	Calendar Event Exporter	Fetch all calendar events from the past week and export them into a CSV file. Send the file to my email.
Productivity & Collaboration	Inspiration Nudge	Generate a short, uplifting message tailored for focus and motivation. Deliver as plain text suitable for email or chat.
Productivity & Collaboration	Microsoft Forms → SharePoint Excel Sync	On qualifying form submissions, append normalized responses to a SharePoint-hosted Excel table and log the update.
Productivity & Collaboration	Outlook Access Checker	Verify whether Outlook email access is available and functional.
Productivity & Collaboration	Microsoft Forms → SharePoint Excel	When a Microsoft Form is submitted and matches certain criteria, update an Excel file stored on SharePoint with the form responses.
Productivity & Collaboration	Microsoft Teams Task Capture Bot	When someone messages me on Microsoft Teams with a task, detect it, ask them for an ETA, and then automatically send them a confirmation email summarizing the task and agreed timeline.
Reporting & Docs	ACME Monthly Report Downloader	Log into the ACME portal, navigate to Reports, download the monthly report, and store it with a standardized filename.
Reporting & Docs	Desktop File Report Builder	Read the contents of a desktop file and generate a formatted report.
Research & Knowledge	Best WordPress SEO Plugin Finder	Evaluate leading WordPress SEO plugins against defined criteria (features, support, performance, ease of use) and email a recommendation. Redact any personal contact details [redacted-email].
Research & Knowledge	Comprehensive Tool Use Case Tester	Scrape [redacted-url] and evaluate all possible use cases of the tool.
Research & Knowledge	Tool Feature Report Generator	Scrape [redacted-url] and produce a structured report of the tool's features and capabilities.
Research & Knowledge	Tool Capability Summarizer	Scrape [redacted-url] to analyze the tool's features and generate a summary of its capabilities.
Research & Knowledge	Competitor Analysis Bot	Scrape [redacted-url] to map out product features and compare them with existing competitors in the market.

Category	Title	Prompt
Research & Knowledge	Discord Feature Explorer	Scrape the Discord website to identify and summarize its key features and capabilities.
Research & Knowledge	Perplexity Feature Analyzer	Scrape the Perplexity website to summarize all features, with emphasis on automation capabilities and Lab Search.
Research & Knowledge	Sprinto Capability Analyzer	Scrape the Sprinto platform and summarize its features and compliance capabilities.
Research & Knowledge	Daily Trending Article Digest	Select a trending article on AI, design, or psychology each morning, summarize in ~200 words, and email the digest.
Research & Knowledge	LinkedIn Feature Overview	Summarize LinkedIn's core features (profiles, posts, search, Sales Navigator, messaging, company pages, analytics) with links replaced by placeholders [redacted-url].
Research & Knowledge	Competitor Feature Mapping	Visit a target product's site [redacted-url], enumerate core features, and map them against known competitors. Output a comparison table.
Risk & Compliance	Password Exporter (Microsoft Edge)	Export saved credentials from the user's own Microsoft Edge password vault to CSV with explicit user consent, encryption at rest, and secure delivery.
Risk & Compliance	Supply-Chain Risk JSON Assessor	Given provided evidence and supplier links (no fabrication), analyze supply-chain risk and return strictly structured JSON per the required schema.
RPA & IT Automation	UiPath Orchestrator Access	Connect to UiPath Orchestrator to access and manage automation processes.
Sales & Marketing	Sales Navigator Lead Pull (20 Records)	Fetch 20 new leads matching saved filters from LinkedIn Sales Navigator and email a summary list with name, role, company, and profile link [redacted-url].
Sales & Marketing	HubSpot Customer Summary Bot	Fetch the five most recent customers or domains from HubSpot, locate their company websites, and generate a short business summary (2–3 sentences) using Azure OpenAI. Email the results via SendGrid.
Sales & Marketing	Multi-Network Post Scheduler	Schedule and publish posts to Twitter/X, LinkedIn, and Facebook on specified dates/times. Provide a queue view, last-minute edit option, and a delivery report per post.
Sales & Marketing	Google Client Prospect Finder	Scrape Google search results to identify potential clients for digital transformation initiatives. Provide a structured list of companies.
Sales & Marketing	LinkedIn Telecom Lead Finder	Scrape LinkedIn to identify telecom industry prospects interested in RPA and digital transformation. Extract profile names and company details, and send the list via email.
Sales & Marketing	Sales Navigator → Tailored Cold Emails	Select SMB finance executives from LinkedIn Sales Navigator and draft tailored cold emails highlighting how [redacted-company] automation scales operations without adding headcount. Save as drafts for review.
Sales & Recruitment	RPA Developer Lead Finder (3–7 Years)	Scrape LinkedIn to find RPA developers with 3–7 years of UiPath experience who are open to work. Compile the profiles into a candidate list.
Sales & Recruitment	LinkedIn RPA Developer Search	Search LinkedIn for RPA developers who are open to work and have at least three years of UiPath experience. Compile the results into a structured list.
Teams Productivity	Teams Task Intake & Confirmation	Detect task-like requests in Teams chats, request an ETA, and send a confirmation email capturing the task description and agreed deadline.
